

“100% of the clinical data you need using no contact, distance testing”

Introducing the industry's first **no contact**, at **home** drug testing service with **on-demand** test results delivered to a clinician's EMR or web portal.

ToxDirect™ is a turn-key toxicology solution designed for healthcare professionals who:

1. Need to monitor telemedicine patients remotely
2. Need to Drug Test at a Distance during "shelter in place" mandates
3. Prefer to eliminate urine and/or oral fluid collections from taking place within their clinic

Urine **sample integrity** is ensured by our proprietary DNA authentication (ToxProtect™) and synthetic urine scanning (SynScan™) technologies.

Turn-Key 3 Step Process

Step #1

1. Provide list of individuals to monitor
2. Risk Category for automated test schedule
3. Home Address and Phone

Step #2

1. Testing kits delivered directly to home
2. Test performed at home
3. Sample returned with pre-posted label

Step #3

1. “Report Ready” notification
2. Reports in EMR or web portal
3. Population health, compliance, and trend data
